LW139.141-75D6 DuoBase System

The LW139.141-75D6 Flexure Table system combines our ET-139 permanent magnet field shaker and PA-141 amplifier together with our 6 inch square Flexure suspension Table. This combination provides a large mounting surface with increased load carrying capacity for larger or heavier than normal test specimens not requiring the force of a larger shaker system. The unique flexure suspension table guidance eliminates the requirement for the oil found in slip table systems. This oil-less design allows operation at other than the horizontal orientation, and adds increased suspension guidance reducing the effects of heavy and off-center loads on the shakers armature suspension system.. The Table flexures are fully rated for 1 inch p-p operation, and the shaker can be uncoupled from the table for operation in its normal vertical orientation with specimens mounted directly to the shakers armature.

The air cooled PA-141 amplifier is direct coupled to the shaker to give the maximum performance at low and high frequencies. Dual meters display the system operating levels and complete shaker and user interlocks help protect the system from accidental abuse.

General Specifications

Sine force	75 lbs force pk
Random force	28 lbf rms random
Shock force	75 lbf pk shock
Frequency Range:	DC to 6,500 Hz
Maximum Acceleration:	
Horizontal, w/ Slip Table	20 g pk, bare table
	5.5 g pk, 10 lb. load
	3.2 g pk, 20 lb. load
Vertical, no Slip Table	75 g pk, bare table
	38 g pk, 1 lb. load
	13 g pk, 5 lb. load
Maximum Displacement:	1.0 inch pk-pk, bare table
Cooling:	Amplifier: forced air Shaker: cooling vacuum
Power Requirements:	3,000 VA @ 100, 110, 200, 220, or 240V, single phase 50/60 Hz
